11 January 2016

Dear Colleagues

**Joint Call with ITER Central Team for Adaptation of JINTRAC Modelling Suite to the ITER Integrated Modelling Applications Suite (IMAS) in the Frame of an Agreement with ITER**

The 12th General Assembly on 17-18 December 2015 agreed to the incorporation into the 2016 annual work plan of a task requested by the ITER Central Team for the adaptation of the JET INtegrated TRansport Code, JINTRAC, code suite to ITER Integrated Modelling Applications Suite, IMAS (EUROFUSION GA (15) 12 - 5.8). The technical specifications for this task are attached as Annex 1 to this letter. The cost of the work defined in the task will be covered by a contract with ITER - no EUROfusion financial support is foreseen. Implementation of the task will follow the agreed "Procedure for the implementation of work requested by ITER or F4E using or related to the JET facilities" (EUROFUSION GA (14) 5 - 4.9).

With the present letter, I invite you to submit expressions of interest for participating in this ITER task. In these expressions of interest, you should indicate the expertise you are proposing to provide in order to carry out the task. Responses will be jointly evaluated by the Programme Management Unit and the ITER Central Team, selecting the technically qualified proposals, after which ITER will issue a formal tender action with the selected EUROfusion Members. Final reports on the task form part of the EUROfusion work plan and must be approved by the Programme Manager prior to their submission to ITER.

If your laboratory would be like to participate in this task, I ask that you complete the form attached as Annex 2 to this letter and return the completed form to [Xavier.Litaudon@euro-fusion.org](mailto:Xavier.Litaudon@euro-fusion.org) no later than midnight **29 January 2016**.
