**To the Heads of Research Units in EU Fusion
Associations and to the Representatives of the
New Member states and associated countries**

Via Email

Dear Colleagues,

Fusion Spin-Offs Survey

It is planned with the European Commission to update our knowledge on fusion R&D spin-off benefits, which can lead to the publication of a new brochure on fusion spin-offs (the brochure published by the Commission in 2003 is available on

http://ec.europa.eu/research/energy/pdf/spin_off_en.pdf).

It is indeed very important to diffuse the awareness that fusion research contributes to many other domains. This letter is to ask your collaboration in gathering new relevant evidence. I therefore kindly ask you to send any new (i.e. not contained in the brochure referred) information you possess about successful spin-offs of fusion. We look for concrete examples of spin-offs implemented in application of developments achieved in your Association, as well as for more general information on fusion technologies which have found applications beyond the world of fusion. It would be most useful if each subject was presented in a very short summary (with possible illustrations). Please give us also the contact details of persons who may provide more specific information, if needed. Contact persons will be involved to develop further the presentation on the selected topics.

I would appreciate receiving your input by **21 December 2009**.

With my best regards,

Jérôme Paméla
EFDA Leader
