High Power Tubes for Scientific Applications

Serge DACQUIN

Thales Electron Devices (TED)

TED is manufacturing klystrons and grid tubes for industrial accelerators especially for sterilization processes as well as high power tubes for fundamental and applied research. After a brief presentation of the company, the focus will be on TED equipment for scientific applications. Discussions with scientists and engineers interested in applications of the high power tubes are welcomed.

Joi 27.08.2009, ora 11⁰⁰, Sala de consiliu, Bloc Turn, etaj 9
