Dear colleagues,

Call for participation in additional tasks for Work Packages Preparation of Exploitation of MSTs, WPMST2, and Preparation of Exploitation of JT-60SA, WPSA

At its 11th meeting on 30 September – 1 October 2015, the General Assembly endorsed the Annual Work Plan 2016 as a draft. In the area of ITER Physics, this includes several tasks which are additional to those already included in the Project Management Plans and so a new call is required to cover these tasks.

I therefore invite you to submit proposals for the additional tasks in the area of ITER Physics for the Annual Work Plan 2016. Details of the general procedure and specifics for the involved Work Packages are given in the attached documents.

1. AWP16-IPH-CfP: Call for participation in ITER Physics Work Packages
2. AWP16-IPH-Call-Response-Form_WPMST2
3. AWP16-IPH-Call-Response-Form_WPSA

Responses will be evaluated by Project/Task Force Leaders, with the support of the Programme Management Unit, and they will prepare a proposal for the allocation of resources. The final allocation of resources will be approved by the relevant Project Boards and submitted by the Programme Manager to the General Assembly meeting of 17-18 December 2015.

For budgeting salary costs, the level for each team member should be provided, in accordance with the 2016 declaration of salary rates by your Beneficiary (see also the attached letter ref. 1582-CM_Lt average salary costs, issued 21 September 2015).
