Dear colleagues,

The 13th Coordinating Committee meeting of the bilateral fusion cooperation agreement Euratom-U.S.DoE is planned for the 12th February 2010.

We would appreciate receiving from you a summary update of current or planned collaborative activities between your respective institutes and U.S. entities. In this respect, please find appended the last inventory dated October 2008, to be used as reference. Your response within the next weeks will allow us to send to DoE an updated inventory in advance of the meeting.

Thanks for your help and kind regards,

Steven Booth
