To: Heads of Research Units

Dear Colleagues,

Niek Lopes Cardozo has contacted you some time ago with a request to reply to questionnaires on the web site of FUSENET.

Though answers were received, it seems that a number of people have overlooked the last questionnaire (on Practica, Work Package 7), that was linked separately at the end.

Your answer to this questionnaire is the essential for achieving the goals defined in this work package and will provide all participants substantial advantages for the future.

It is also the first step in order for us from this Work Package to make available to (some of) you, the existing funding (250 kEuro and 16 ppm).

1. we want to share information among all participants on what hardware is available for practica (experiments where students can learn hands-on). If you have such a practicum, please tell us. Other participants may be interested and then contact you for example to see if they can duplicate it. There can be financing available in this case for you to provide the information so that this duplication can be done, with benefits both to you and the institution that duplicates it.

Request to fill out FUSENET questionnaire on practica by Feb 15.

2. if you feel you need hardware to provide a practicum for your students, please tell us. There is financing available from this Work Package to build such practica. So please tell us if you need a practicum. If we do not know you are interested in building a practicum experiment, you may miss out when you can apply for the funding.

3. we still need to set up the rules on how to make available the money. For example: how to split the funding between providing information for duplication and building new practica. We appreciate your input on this.

Those are the three parts of the questionnaire: Inventory, Needs, Rules.

The direct link to the questionnaire is:

<http://buon.fjfi.cvut.cz/fusetnet/wp7/>

I would appreciate if you could answer the questionnaire by February 15.

Please read the information carefully (e.g. we would like one reply for each of the hardware set-ups you have).

You may want to forward this e-mail to the person in charge of the practica.

Please excuse me if you receive this request more than once, as there is some overlap in the addressee. Thanking you for your cooperation and looking forward to hearing from you.
