PlamsaNet 10-023 Culham Summer School

This year's Culham Summer School will run from 12 to 23 July 2010 and is the forty-seventh in the series organised at Culham Science Centre in Oxfordshire, a leading site for research in plasma physics and controlled nuclear fusion carried out under the auspices of Euratom and the United Kingdom Atomic Energy Authority. The aim of the Summer School is to provide an introduction to the fundamental principles of plasma physics, together with a broad understanding of its fields of application. We assume no previous knowledge of the subject, but familiarity with electromagnetism and applied mathematics at first degree level will be helpful.
