

**EFDA Taskforce for Plasma-Wall Interaction**

## **Joint Working Session of SEWGs Material Migration and ITER Material Mix on Model Validation**

**Tervaniemi, Finland, 31 January – 2 February 2011**

**Venue:** Tervaniemi, built in 1886, was originally the summer place for the owner of Tervakoski paper factory. Located by a lake, it nowadays provides an inspiring atmosphere and modern facilities for meetings. In the evenings you can tune up your appetite with Finnish specialties - sauna and ice-water swimming - and enjoy a dinner in the old-style dining room.

**Programme:** Material migration and formation of mixed materials are closely linked. The description of the underlying processes within a self-consistent model has been main subject of recent code development and extension. The working session program aims at reviewing completed and ongoing validation activities of the existing codes. Based on these results, future code developments and validation experiments will be discussed with particular emphasis on experiment coordination between different modelling groups and tokamak teams.

**Accommodation:** Tervaniemi offers cottages for 1-6 people at a price starting from 115.50 €/person/night. The prices include breakfasts, lunches, also on Wednesday, and the dinner on Tuesday. In addition to the cottages there are also a few single and double rooms available (from 151.50 €/night).

**Transport:** There are daily flight connections between Helsinki and all major European destinations. Participants are advised to arrive on Sunday 30<sup>th</sup> January. Information about recommended hotels in Helsinki will be distributed to participants. The local organizers will provide transport from Helsinki to Tervaniemi on Monday morning. Wednesday session ends in the afternoon and transport to the airport is provided as well.

**Staff Mobility:** The meeting is eligible for EFDA Staff Mobility Support. To allow preparation of invitation letters in due time, associations are kindly requested to supply the names of nominated participants to Dr. Roman Zagorski, [roman.zagorski@efda.org](mailto:roman.zagorski@efda.org), by 2nd of December 2010.

The meeting is organized by VTT and Aalto University, Association Euratom-Tekes. For more information, please contact Dr. Markus Airila, [markus.airila@vtt.fi](mailto:markus.airila@vtt.fi), tel. +358 20 7225094. Information on the Tervaniemi site: [www.tervaniemi.com](http://www.tervaniemi.com).
