Dear Colleague,

this is the first announcement of the 2nd International Conference Frontiers in Diagnostic Technologies - FDT2

<http://fdt2.frascati.enea.it>

which will be held in Frascati (Rome, Italy) from 28 to 30 November 2011.

The Conference FDT2, hosted by INFN (National Institute for Nuclear Physics) - LNF (Frascati National Laboratories), is organized by INFN and ENEA (Italian Agency for Energy, New Technologies, and Environment).

This interdisciplinary conference aims to bring together various scientific communities (laboratory plasmas, nuclear fusion, astrophysics, nuclear and particle physics, accelerators, lasers, medical equipments) to discuss diagnostic measurements and technologies with a view to defining new strategies of common interest.

Topics of the Conference FDT2:

1. Measurements of temperature and density
2. Energy spectrum of particles
3. Spectroscopy in various ranges of wavelengths
4. Imaging in various ranges of wavelengths
5. Techniques of analysis of massive databases

A satellite meeting will be organized on "Techniques of Acceleration"

The programme will include tutorial lectures , invited oral presentations and posters.

Warm regards

Francesco Paolo Orsitto
