Dear Colleagues

**Call to the Associations to propose activities within the Task Force Fusion Technology at JET for the implementation of the approved 2012 Work Programme**

The purpose of this letter is to invite you to propose scientific and technical (S/T) activities within the frame of Task Force Fusion Technology at JET (TF-FT) for the implementation of the JET Work Programme. The proposed activities shall be performed in the year 2012.

Please note that, although the EFDA 2012 Work Programme was approved at the last EFDA Steering Committee meeting on 29 June 2011, the fusion budget has not yet been agreed. Evaluation of the proposals made in response to this call will be done on the basis of the work programme but finalisation of the corresponding task agreement will only be possible once the budget is known.

The details/guidelines are given in the attached extract from the JET 2012 Work Programme, "Programmatic guidelines for JET Fusion Technology Activities in WP 2012".

In line with the above cited guidelines, I would appreciate if you could let me know the type of activities you would like to conduct in your Association within the framework of this programme. Your proposal should include, for each activity, a detailed description of the work to be performed (please, use the attached proposal form). These should be received **not later** than 21 October 2011. The proposals will be assessed by the EFDA CSU at Culham.

To discuss the technical content of the activities, please contact the Fusion Technology Task Force Leader Paola Batistoni ([batistoni@frascati.enea.it](mailto:batistoni@frascati.enea.it)) or the Deputy Task Force Leader Jari Likonen ([Jari.Likonen@vtt.fi](mailto:Jari.Likonen@vtt.fi)). For further information please contact Dominique Barbier ([dominique.barbier@jet.efda.org](mailto:dominique.barbier@jet.efda.org)) at the EFDA JET CSU in Culham.
