 - UB-FF - **Prof. Dr. Stefan Antohe**, E-mail: santohe@solid.fizica.unibuc.ro
 - UBB – **Conf.Dr. Cristina Dobrota**, E-mail: cristina.dobrota@ubbcluj.ro
 - AIRA - **Dr. Cristiana Dumitrache**, E-mail: crisd@aira.astro.ro

- **Short description of the project:**

Given the fact that Romania is a recent member of ESA (since 2011), in order to achieve a fair return on its membership funds in a timely manner it is absolutely necessary for Romania to implement ***a clearly defined National Strategy*** for the development of its R&D and T&E space science and space exploration capabilities.

- **Project goal:** The main objective of the STAR Science project and of the underlying STAR Science consortium is to elaborate a **National Strategy** for the period 2012-2020 that will allow Romania to increase its participation to ESA's science programmes.

- **Objectives:**

- Define and identify scientific niches;
- Developing a National Strategy for the period 2012-2020;
- Providing scientific support for the development of a Romanian point of view to the Council of Ministers of ESA.

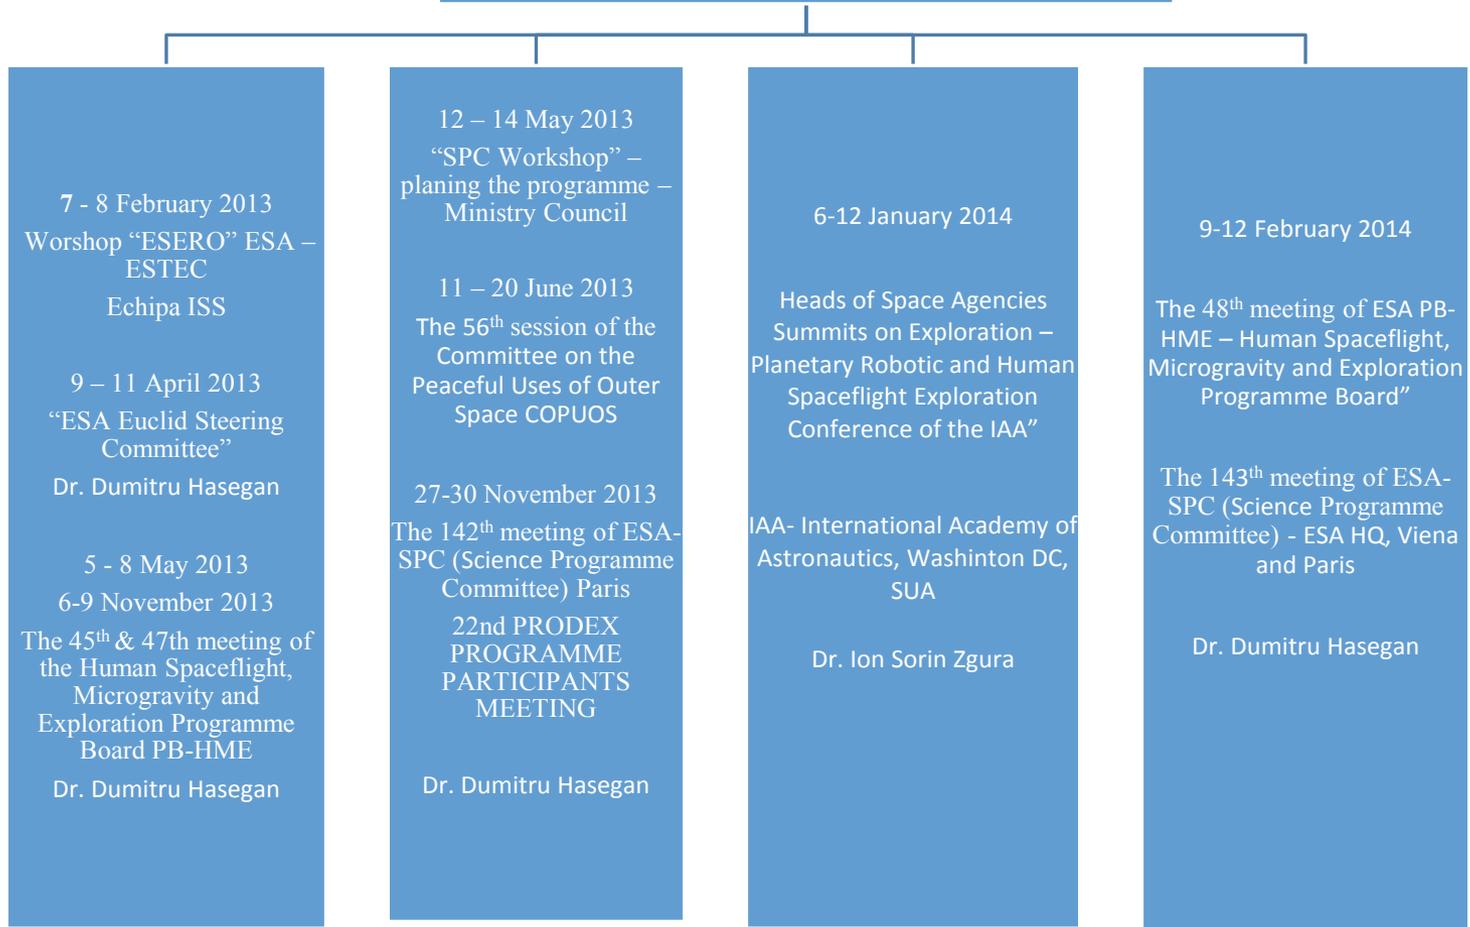

Work plan of the project

Task name	Activities
Development of the Strategy of the Space Science and Exploration of Cosmic Space 2012	Activities 1 – 8 <ul style="list-style-type: none"> - Romanian state of the art in the field; - Economical & commercial opportunities; - Methodologies & instruments for monitoring & evaluation; - Programmes for R&D student trainings; - Opportunities for Spin-off development; - An efficient communication infrastructure; - Outreach; - Technical Workshop & training activities; Specialized training infrastructure.
Strategy and support activities development for ROSA participation to the scientific ESA Programmes 2013	Activities 1- 7 <ul style="list-style-type: none"> - Decisional support for participation to the ESA Committees; - Scientific support for participation to the ESA Committees; - ESA Programmes “Info Day” Conferences; - An efficient communication infrastructure; - Outreach; - Technical Workshop & training activities; - Specialized training infrastructure.
Romania participation to the scientific ESA Programmes 2014	Activities 1- 7 <ul style="list-style-type: none"> - Identifying industrial partners; - Identifying the stakeholders in economical & financial opportunities; - Information Center on technological solutions and practical demonstrations; - An efficient communication infrastructure; - Outreach; - Technical Workshop & training activities; - Specialized training infrastructure.
National Infrastructure for Space Science Development 2015	Activities 1- 9 <ul style="list-style-type: none"> - Relevant indicators for strategies in space science & technologies; - Current & future capacity evaluation in space science and technology; - Identifying the priority areas; activities integration into local and institutional development strategies; - Program for improving institutional structures and processes; sustainability; - Program for strengthening the skills, competencies and abilities of young researchers; - An efficient communication infrastructure; - Outreach; - Technical Workshop & training activities; - Specialized training infrastructure.

2013 - 2014 ESA Committees

Decisional support for participation to the ESA Committees;

Scientific support for participation to the ESA Committees;

Training activities

Bucharest Solar Station (1956-2013)

Cristiana Dumitrache
Astronomical Institute of Romanian Academy

Time milestones	Observational programs	Observations Solaris Bulletin
<ul style="list-style-type: none"> Founded in 1956 First Solar Observation (1957–1997) Tekla Solar Eclipse 1959 2001–2002: Solar 2 Astron program and observatory observations 2004 – Solar beam 2002–2009 – Repair of the solar dome 2008 – New 3D alpha filter 	<ul style="list-style-type: none"> Solar patrol (1957-1997) International Geophysical Year (IGY) 1957-1958 International Geophysical Year (IGY) 1957-1958 Global Variations of the Solar Magnetic Field, 1958-1962-1974 OSTRO-OSTAR (1964-1977) Campaigns of Observations (2001-2004) 	<p>Observations Solaris Bulletin (Bucharest, Romania Academy Publishing, 1956-1998) (French language, prepared for the Bulletin Academy Year, was the main journal that published the entire data registered during the solar patrol observations at Bucharest Observatory. The Bulletin is actually a color catalog containing data of our activities (photographic plates, films, etc.) which are collected with one yearly issue, published in the date of the next group activities, the observed Halley Stern and prominent activities.</p> <p>After 1999</p> <p>A 317-CCD camera, 765 x 510 pixels field of view (FOV) of the solar disk, was purchased and for the next scientific endeavor was installed for CCD observation. This change does not permit full disk observations and so the solar patrol program could not be continued. Observations were only performed in Italy.</p> <p>The 120-120R was replaced (Zain, 2007) has been used as daily, visual and photographic observation of the photosphere for minor outbursts and solar flares. The support data monthly bulletins were sent in data centers of Toulouse (1957-1993), Zainab (1957-1992), Freiburg (1993-1998), and Strasbourg (1985-1995).</p> <p>The 120-120R was replaced (Zain, 2007) has been used as daily, visual and photographic observation of the photosphere for minor outbursts and solar flares. The support data monthly bulletins were sent in data centers of Toulouse (1957-1993), Zainab (1957-1992), Freiburg (1993-1998), and Strasbourg (1985-1995).</p> <p>The 30-120R was replaced (Zain, 2007) has been used as daily, visual and photographic observation of the photosphere for minor outbursts and solar flares. The support data monthly bulletins were sent in data centers of Toulouse (1957-1993), Zainab (1957-1992), Freiburg (1993-1998), and Strasbourg (1985-1995).</p> <p>The 30-120R was replaced (Zain, 2007) has been used as daily, visual and photographic observation of the photosphere for minor outbursts and solar flares. Future plans

- New CCD 2048x2048 px for astronomical observation of the photosphere and solar disk full
- New CCD 4096x2048 px for photosphere
- Observing core technology needed for scientific and educational purposes by the Romanian National for Solar patrol (under review)

No resources are yet assigned for solar patrol.

CHARACTERIZATION OF HALOPHILIC BACTERIAL COMMUNITIES IN TURDA SALT MINE (ROMANIA)

Rahela CARPA, Anca KEUL, V. MUNTEAN, Cristina DOBROTA
Babeş-Bolyai University, Institute of Technology/Teratology, Faculty of Biology and Zoology, 1, K. Kogălniceanu, 400384, Cluj-Napoca, Romania, E-mail: r.carpa@yahoo.com

Aim of the work
To find a research tool in order to evaluate the functional diversity of the microbiota adapted to extreme salinity environment.

Sampling sites
A - From boronite of Isaf Mine (0-4 m); B - from Big Hall of Rădoş Mine (4-2); C - from Lake of Maria Tereza Mine (1-12)

Intensity of phosphatase activity (IPA), initial and potential developmental activities (ADA and PDA), substrate activity (SA)

The enzymatic (EISQ) and bacterial (BISQ) indicators of salt quality

The bacterial number of aerobic heterotrophic (AH), anaerobic (AN), and facultative (FA)

Universal bacterial primers, targeting 16S rRNA gene:
F: 5'-AAGATTGATCTGGTCC-3' and R: 5'-GCCTGCTTTTCAAGG-3'

PCR amplification of 16S rRNA gene from different bacterial isolates from Turda salt mine

Conclusions
The identified bacteria in salt samples were aerobic heterotrophic, anaerobes, and facultative. All the four quantitative enzymatic activities studied here showed variation of their maximum depending on the sampling place and the enzymatic class. Both the enzymatic and bacterial indicators of salt quality reached the low values: EISQ < 5.1 and BISQ < 2.8. These values indicate the presence of low enzymatic and bacterial potential in these samples. PCR amplification of 16S rRNA gene from bacterial isolated from Turda Salt Mine shows a characteristic band of about 1500 bp for each sample.

Acknowledgements: This work was financially supported by a grant from Romanian Space Agency (ROSA, STAR Technology), Romania, PCR 120/03.

ESA Programmes “Info Day” Conferences;
An efficient communication infrastructure;
Technical Workshop & training activities;
Specialized training infrastructure.

Technical Workshop & training activities

Training activities - UBB: EXPOSE facilities, Exoplanets;
Desiccation and radiation resistance of extremophiles,
Extremophilic microorganisms, Evolution: Origins of Cellular Life

Workshop "Cosmical Phenomena That Affect Earth And Their Effects,, IAAR - 18 October 2013; Internship “Reduction and analysis of spectroscopic data”

School Hot topics in Astrophysics, together with OPTICON;
September 24-28, 2013

ISS Talks : Prof. Dr. Benjamin Harms, Prof. Tkachev L.;Tkacenko A.;
Prof. Dr. Ken-Ichi Nishikawa; Prof. Dr. Roberto Casadio

Participating in Optional Programme INFO DAY – ESA-ROSA; PRODEX - ROSA; JRC Conference Italy- Ispra; GMES Conference

Radiation and desiccation resistance of hyperthermophilic microorganisms

In data de 13 Mai 2014, in cadrul evenimentului Romanian Space Week, a avut loc o intalnire pentru lansarea Biroului European de Resurse pentru Educatie Spatiale (ESERO-Romania)

ESERO este un proiect initiat de catre ESA cu scopul de a folosi fascinatia pe care o prezinta domeniul spatial pentru a incuraja predarea si invatarea de materii STEM (Science, Technology, Engineering, Mathematics) in scolile europene primare si secundare.

2014 Planned activities

- Database to identify the potential collaborators from SME that can perform a technologic transfer (electronics);
- Continue to search keywords for Romanian ISI Publications in Web of science database - <http://apps.webofknowledge.com/>
- Continue the search for Romanian patents in other external databases like EspaceNET from European Patent Office - <http://worldwide.espacenet.com/>
- Continue the students training to ensure the continuity in the field;
- Continue to disseminate ESA related activities;
- Encourage researchers to apply for other types of funding: Horizon 2020.

Abstract:

ROTalkScience

Researchers' Night in Romania for
2014 and 2015.

- Project's contribution to the goal of the STAR Programme

National Strategy in the field

Identifying new niches CDI space science:

- This project will be the basis of the development of the Romanian space programs integrated to ESA programs.
- The assessment of current Romanian space policies, and the assessment of the research teams which may be constantly involved in space research, as well as of the industrial partners may open a new direction of joint research and of collaborative projects with ESA.

Conclusions:

- participation to international trainings in order to ensure continuity in the field;
- Increase the number of Romanian Space Science Experts;
- Strong partnerships to increase the Romanian participation to ESA Programmes;
- Outreach activities.
